The Insider Scoop

Task Size

The UNH Coding Bootcamp provided

3 WEEKS

to complete an app.

Task Assignment

To create a responsive app that utilizes React, server-side APIs, Sequelize, and a CSS framework.

Our Goal

To create a forum that connects users who want to sell or trade their consignment shoes.

Roles

Backend/Server-side - John and Michael

Frontend - Karla, Hannah, and Megan

2.0

- To have a chat feature that allows users to communicate with each in real-time to complete trades.
- To have a credit card/PayPal platform to allow users to buy shoes from sellers who only want to sell.
- To have a seller rating system.

Scope Limits

- Time
- Financing
- Additional commitments

Meetings and Process

The team met 3-4 times a week during the project's duration, each meeting lasting several hours. We expertly navigated virtual meetings and remote collaboration by assigning tasks per page to avoid merge conflicts.

Prioritization

- Authentication
- User profile
- Seller profile
- The database and seeding
- User editing capabilities
- Connecting sellers and buyers

Repo

github.com/jbouchard13/project-3.git

USER STORIES

User Story 1

User arrives to the app with a pair of shoes to sell, needs a place to make this one-off sell.

User Story 4

User arrives to the app looking for a new pair of shoes. They see a pair they like – the poster wants to sell. The user has the money to buy the pair.

User Story 2

User arrives to the app with a pair of shoes they don't want anymore but loves shoes and would like something new. User places shoes up for a trade. Someone wants the shoes user posted and has a pair to offer for a trade.

User Story 3

User arrives to the app looking for a new pair of shoes. Sees a pair they like – the poster wants to trade. User 3 has shoes to offer as a trade.
